This day about 3 O Clock in the Afternoon My Faithful Old Friend Alexander Dunlop terminated his Mortal course at the 85 year of his age [blank] of which he had the Management of the Farm of Wm. Legg James Templeton, and John Templeton, with all of whom he was considered more as a disinterested Friend than a Servant.

When

13

advantages of Literary and Scientific cultivation might have elevated him to a place among Philosophers, but confined as he was to the pursuit of Husbandry, those Talents which might have attracted more attention (had he been placed in a more conspicuous situation,) were displayed alone in the cultivation of the soil and the care of Cattle, even in these matters however the innate vigour of his mind appeared, by experience conjoined with accurate observation enabled him with experience

to convince
many of his neighbours of the propriety of his
practice

14

practice and to lead them to
adopt his plans. He was
among the first to shew in
Malone the utility of Lime
as a Manure, and he soon
without the aid of Chemi-
-cal Knowledge demonstra-
ted the
futility of liming the same
ground a second time
without at the same time
giving the Lime fresh Vege-
table matter for it to act
upon, and also that Liming
wet land without previous
draining was totally useless
In him with strong feelings
of Philanthropy were blended
equally strong feelings of Be-
nevolence, and all the Ani-
mals under his care, received
the

15

the most unremitting attention
to their wants while in heat
and every kindness during sick-
-ness
To every improvement in Agri-
-culture which he heard of he gave a candid exa-
-mination, and prejudice never
prevented his adopting a new
plan as soon as his reason

was convinced of its utility
and its capability of being
reduced into practice consi
-dering the Climate, the Soil
and the expense
Throughout the eventful
period of the Rebellion a Peri
-od which proved such a Touch
-stone to Man's Hearts he ex
-hibited the Man of Peace,
by his candour and advice
he endeavoured to prevent
Mischief, and to soften the ex
-aspirations

16

-aspirations of Party Spirit.
The exhibition of this Charac
-ter I presume not to offer to
the high in rank for perhaps
they would scorn it, But it
is presented to those in the
Humbler walks of Life, and
those who had the best oppor
tunities of observing him can
say He was a Man of whom
they may justly be proud
for in him was exhibited
the true dignity of Human
Nature. For this did he live
innocently and usefully em
-ployed, giving and receiving
kindnesses.
Loving Mercy, acting Justly
And walking humbly before
God.
And if this sketch can induce
even

17

even a single individual to
resolve that they too will endea
-vour to Merit the like Eulo
gium when their days are
at an end, the object of the
writer will be completed

[Newspaper cutting:]

ON PARLIAMENTARY REFORM

We are favoured with the following communication by a true Friend to the Freedom of Ireland.- Our anxiety to be impartial - to give to both sides of the question whatever can be urged in favour of either, induces us to give insertion to the following honest, though severe ebullition. There is one answer to all this animated declamation - it is this: that the immediate effect of Reform in Parliament must be the dissolution of that infamous and destructive measure, the Union. It is true, our excellent friend has no objection to embrace the Reformers, in case such a condition will be declared by them as the effect of Reform; but he must, on re-

flection admit, that this would be an unnecessary declaration for the English Reformer to make, as a free Parliament never can exist in England, as long as it is exposed to the exercise of that power, which an artful Minister must always find in one hundred Irish Representatives.

TO THE EDITOR OF THE IRISHMAN.

SIR,

The high station which your paper holds in the estimation of the Public, and the respect that I feel for all those who exert themselves in the cause of the Liberty of Mankind, induces me to vindicate the character of my country, by shewing that the seeming apathy which prevails about Parliamentary Reform has its foundation in Reason. Ireland has been called upon; but alas! under the present circumstances, of what use to Ireland would be Parliamentary Reform? Her name is blotted out from the catalogue of nations. There is no path on which Irishmen can proceed to acquire true fame, and Patriotism is only found mentioned among the Historical Records of our Country. Think not that Irishmen have remained ignorant of the crimes which have disgraced the Governors of Ireland from the entrance of the bloody Strongbow, of the perfidious Treaty of Limerick, only made to be broken, of the last deed of her degenerate sons, who, seduced by the lures of the British Minister, descending from their high station to the lowest stage of debasement, sealed the death warrant of their country. Ireland has experience still more than Britain the disadvantages of a *corrupt* Parliament. She has seen that the Habeas Corpus Act, that Palladium of Personal

Liberty, could be rendered void, at the will of the British Minister, that to whatever extent acts of malignity were carried by those who call themselves

the friends of the British Government, an Act of Indemnity secured them from punishment. Thus did that most unjust ordinance generated by power, and not recognised by the constitution, an *ex post facto Law*, with equal handed injustice skreen the furious royalist and punish the poor and ignorant offender. But of what use would be the Reform of *an English Parliament* be to Ireland? Have we not known our country calumniated while Irishmen remained silent, and have we not experienced how little Faith can be placed in men removed from the invigorating influence of the applause of their countrymen and placed in the immediate vicinity of regal splendour, which in these times of avarice and ever restless ambition, like the eyes of the basilisk convey a deadly poison? What has Ireland to hope for from the exaltation of Britain? Has Britain ever acted the part of a generous friend to Ireland? Has she not hitherto appeared as an envious Monopolist, as an insolent Conqueror, and what reason has Ireland to hope, that the selfish, the interested policy, which has for so many years been the cause of numberless acts of injustice will ever willingly restore her Rights to Ireland? Rights which were not lost in the field, but which, after silencing the groans of expiring patriotism by tortures, death and imprisonment, were seized with malicious triumph.

And can the Men of Ireland forget the year 1800, when soothed by fair promises, and flattered with the hope that the chains would be broken which yet bind

millions of their fellow countrymen, they were induced to submit without resistance, and to behold, though not without a sigh the annihilation of the Independence of their country? If Ireland could forget that she was once a nation - that her brave warriors, whose names adorn her almost forgotten annals, triumphed over her foes, or died in her defence, the days when her volunteers, those unbought defenders of their country, preserved peace in the land, and deterred every enemy from approaching her shores without the assistance of your mercenary legions - if she could forget the apathy and seeming complacency with which Englishmen beheld the flames of her burning houses in which the sick and aged often met their death, the scourgings, the executions, which spread desolation over the land! before that the Fatal Act of Union deprived her of her Parliament, of the means of making known, of exposing public wrongs, Ireland might have listened to your request. While the Parliament men resided in their country, the feeble voice of Patriotism was sometimes heard in the house, and the hopes of Reform betimes enlightened the gloom which darkened the atmosphere; but the voice of an Irishman is no longer heard pleading the cause of his country, and

28

of what use would now be the most strenuous exertions of Irish Patriotism against the preponderating influence of England? Could Irishmen have any hope that a generous spark would warm the breasts of Englishmen, that they would rejoice in the prosperity of any nation but their own, then might the sons of Ireland join in with heart and hand to assist them in obtaining their rights.

The present object calls for your most strenuous exertions, the civilised world looks with anxiety to the conclusion. If Britain now fails in this her last struggle in the all-inspiring cause of Liberty, despondency may take place of hope, and despair produce a listless imbecility. Ireland, long before this, felt her situation, she saw the path for her to pursue, the day star of Liberty appeared above the horizon, clouds obscured it, it has gone down, and, without superior inducements than Britain yet holds out, she cannot rouse the dormant energies of Ireland - and what are those inducements? The restoration of *Self Legislation* - the restoration of the Lords and Commons of Ireland;- thus preserving to her, her natural Protectors and the *true* soul by which our country can only be animated.

A.U.I.

37

October 1819

In regard to the right of the nation
to be represented, this right has, ever
since France existed, been acknow-
-ledged, by the Kings, the Ministers
and the Magistrates, who have
merited the National esteem. The
claim of unlimited prerogative

has had, undoubtedly by, a number
of Partizans; so many personal
interest are involved in that
opinion! But what names
stand adverse to each other in
this cause. Louis XI must be op-
posed to Henry IV; Louis XIII to
Louis XII; Richelieu to De l'Ho-
-pital; Cardinal Dubois to M.
de Malesherbes; and, if we were
to quote all the names pre-
-served in history, we might as-
-sert at a venture, that, with
few exceptions, wherever we
meet

38

October 1819
meet with an upright heart or
and enlightened mind, no mat-
-ter in what rank of society,
we shall there find a friend
to Liberty; while unlimited
power has hardly ever been
defended by a Man of talent
and still less by a Man of
virtue.

Consideration on the
French Revolution by
The Baroness de Stael
1. p. 147.

How great a fault under existing
circumstances! but also how great
an error, in point of principle,
was it to forbid the people to

return those who have already
shewn themselves worthy
of its confidence! In what
country do we find a suffi-
cient

39

October 1819
cient number of capable per-
sons to enable us to exclude,
in an arbitrary manner,
Men already known, already
tried, and practically acquaint-
ed with business. Nothing costs
a state dearer than deputies
who have to make their for-
tune in the way of reputation;
men of acquired property of this
kind also, ought to be preferred
to those who have still their
wealth to seek.

Same p. 425

In November 1792. Mr Thomas
Holcroft became a member of
The Society for Constitutional
Information, and although
he did not altogether agree
with all the opinions their pro-
mulgated

40

mulgated it was his opinion
that it was "the duty of every
man to think seriously, and
act with vigour. Passengers
in a storm labour at the Pump

are upbraided if they linger,
and in danger of being thrown
overboard. Individual and gene-
-ral safety are the same; and
the man who is not trusted
with the helm, may yet aid
to heave the lead, or cast the
anchor.

Mr Holecroft, believing that all
men, and all actions contribute
more or less to the general good,
had long been accustoming him-
-self to keep that good in view.
Stimulated by the considerations
just mentioned, and by the
events that pressed with daily
as

41

October 1819
astonishment on the mind; he
ardently applied himself to
the study of Man, and the means
of promoting his welfare, and
lessening the evils that re-
-sult from his present vices and
imperfections. The chief of the
principles, to which this enqui-
-ry led, were that man is happy
in proportion as he is truly
informed; that his ignorance
which is the parent of his
misery and vices, is not a
fault, but a misfortune
which can only be remedied

by infusing juster principles,
and more enlightened notions
into his mind; that punish-
-ment, violence, and rancour
only tend to inflame the pas-
-sions

42

October 1819
sions, and perpetuate the mis-
-takes the are meant to cure;
and that therefore, the best and
only effectual means of amelio-
-rating the condition of mankind
is by the gentleness of instruc-
-tion, by steady enquiry, and
by a calm, but dauntless reli-
-ance on the progressive pow-
-er of truth.

[Newspaper cutting:]

WHISKEY.

To the Editor of the Belfast Chronicle.

SIR,

The world, which has gone jogging on for so many years, and which has afforded so much comfort to us Lords of the Creation, seems about to be turned out of its course; and was it within the power of a set of fool-hardy visionaries, who appear to be desirous of changing every thing which does not accommodate itself to their whimsical schemes, I really do not know how soon it might not be turned inside out. It was but the other day I was called a hard-hearted, unfeeling aristocrat - a man without one spark of patriotic fire - a friend to despotism, war, corruption, intolerance. And, my dear Sir, what do you think all this was about? It was because I would not go and sign a promise to quit using Whiskey - that exhilarating beverage so dear to Irishmen of all denominations - Protestant and Catholic - aristocrat and democrat - man, woman, and child! Yes; he would have me to forswear

taking a drop of Whiskey. Now, I have enjoyed so much pleasure from a drop of Ennishowen, both when travelling in cold and heat, wet and dry, by night and by day, that I would think it a sin against St. Patrick and our holy island, to quit this balsam of life. Oh! Sir, did you ever see to honest fellows just half seas over? If you have, surely you would not insist on my quitting the dear source of joy. -

Then,

"What tears of rapture and vow making,

"Profound intreaties and hand shaking!

"What solemn, vacant interlacing,

"As if they'd fall asleep embracing

"-----, in the turbulence of glee."

I doubt this silly business has been set on foot by some fellow who was too poor to buy a glass, and wished to conceal his poverty under the shew of patriotism. But, my dear Sir, as long as I can afford to pay the taxes, and enjoy the pleasure of a social glass, I think this plan is going a little too far. *Moderation, moderation*, Sir, is my creed, and a moderate reform is what I desire, which I think might be accomplished by the following plan: Those who have accustomed themselves to take two glasses, might leave off one; and those who have enjoyed four, might leave off two, and so in proportion. By this means, I have little doubt, but all parties might be satisfied, and a moderate reform speedily obtained. Don't insinuate that I wish only for half measures! Triennial Parliaments and a representation of property for me. How could those fellows who do not know the comfort of even one glass, understand any thing about representation and the constitution, when they do not even know that it is

the first principle of a good Government, to give to every man who can afford to enjoy them, the comforts of this world. How should they be judges of what was best for themselves? How should they, poor ignorant souls, know anything about laws? Their business is to obey those made by men who enjoy leisure to think about such things; and we all know, that nothing enables a man to think better, so long as he can keep from dozing, than getting a glass or two of good Whiskey. Have you not heard of what that great law and constitution maker, Peter the Great, said of our native - that of all wine it was the best; and that when the cares of governing our own country pressed hard upon one of our late Lords Lieutenant, he got an infinity of comfort from a taste of our National Wine, and was enabled, by its assistance, to manage the State helm with unheard-of satisfaction and moderation! Moderation! a moderate reform, I am satisfied, will fit the country best. Prettily, indeed, would the Radicals, with their universal suffrage, election by ballot, and annual Parliaments, govern the country, if they would deny us a drop of the all-inspiring Whiskey!

A REASONABLE REFORMER.

[Handwritten signature: John Templeton]

50

pleased to do the honours of the nation in such a way as to represent it as the most miserable of all human associations. What indeed is more miserable than to be incapable either of respect for Justice, or of love for our country, or of

energy of mind; virtues of which
the whole - of which any one
singly, is sufficient to render a
nation worthy of liberty? Foreign
-ers do not fail to lay hold of these
expressions, and to exalt them
-selves in their own opinion
as if they were of a nobler
race than the French. This
ridiculous assertion however,
means only one thing, that it
suits certain privileged persons
to be acknowledged as alone fitted
to govern France with wisdom, and
that

51

[Blurred writing]

52

[Repeat of PDF 50]

53

that the rest of the nation should
be regarded as factious.
We shall examine, under a
more philosophic and impari
-al point of view, what is meant
by a "people made to be free" I
would simply answer; it is a people
who wish to be free: for I do not
believe that history affords one
example of the will of a whole
nation not being accomplished.
The institutions of a country, where
ever they are below the knowledge
diffused throughout it, tend neces

-sarily to raise themselves to the same level. Now, since the latter years of Louis 14 down to the French Revolution spirit and energy have belonged to individuals, while government has been on the decline. But it will be said, that the French, during the Revolution, incessantly wandered between folly and crime

54

crime. If it were so, this must be attributed, I cannot too often repeat, to their former political institutions for it was they that had formed the nation; and if they were of a nature to enlighten only one class of Men, and deprave the mass, they were certainly good for nothing. But the sophistry of the enemies of human reason lies in their requiring that a people should possess the virtues of liberty before they obtain liberty; while it cannot acquire these virtues till after having enjoyed liberty, since the effect cannot precede the cause. The first quality of a nation that begins to be weary of exclusive and arbitrary governments is energy. Other virtues can be only the gradual result of institutions which have lasted long enough to form a

public spirit. There have been
countries

55

December 1819
countries, like antient Egypt in
which religion, being identified with
policy, impressed as passive and
stationary character on the man-
-ners and habits of men. But in
general, nations are seen to im-
-prove or to retrograde according to
the nature of their government.
Rome has nowise changed her
climate, and yet, from the Romans
to the Italians of our days, we
can run through the whole scale
of the modifications which men
undergo by diversity of government.
Doubtless, that which constitutes
the dignity of a people is to know
how to give itself a suitable go-
-vernment.

Saw with a Mr Montgomery in
Belfast several stuffed specimens
of Birds among which were the
Falco Buteo Shot at the Cave Hill

Subbuteo

Colymbus Glacialis

Immer

And from this specimen of the *C. gla*
-cialis I am satisfied that the *C. im*
-mer is the female as the head and
neck of this specimen had not when
killed acquired the fine dark purple
with the white marks, but was
cinereous with a brownish
the exact colour of the *Immer* with
the white specks, while the back had
the black spotted feathers of the *C.*
glacialis

There was likewise I think the *Fu*
-lica

57

December 1819

-lica aterrima, but as I had for
-got the distinguishing character
the band at the knee, I only
concluded that it was this spe
-cies by it's being nearly as big
again as the *F. atra*

to blast the fortune and fame of
the most deserving individual
who happens to become the subject
of their unwise precipitation. But
it is not the individual only who
suffers, but the whole body of which
these persons are members. What
man, capable of an original
thought or bold discovery, will
venture to submit his labours to their ani-
-mad version, if, in proportion to
their novelty, importance and
interest, they are to be visited with
disregard and opprobrium, in
place of the honour they may have
earned.

If (such people) had lived in the
days of Copernicus, and were to
pass a judgement on his discove-
-ries, with their goodwill, the

rotation of the earth would never
have found its way into daylight -
- rank

59

December 1819
- rank heresy! it contradicts the book
of Josuah! stifle it in its birth!
your duty to Gods requires the sup-
-pression of those truths which
most honour him!
No, their reply, these are not truths -
for truths must be known by their uti-
-lity, and utility is not an attribute
of heresy and materialism. Such
is their argument; but, by a dexte-
-rous use of these terms, there is not a
truth in physics or morals that might
not be easily transmuted into false-
-hood and crime. I unreservedly sub-
-scribe to dictum of Warburton, that
"we may as certainly conclude that
general utility is always founded
on truth, as that truth is always
productive of general utility". But
shortsighted and ignorant as we
are, is it for us to pervade the vast
and contemplative system of Providence
and decide with formal precision
what is to be infallibly useful or per-
-nicious

60

-nicious in the administration of
the universe? Our business is
to discover truth wherever we may

have skill enough to find it, and leave it to God to confirm its utility. In matters (says Hooker) which concern the actions of God, the most dutiful way on our part, is to search what God hath done; and, with meekness, to admire that, rather than to dispute what he, in congruity of reason, ought to do"; in other words, what we, in our wisdom, shall prescribe to the Wisdom of God.

If there be a circumstance upon earth of value in the eyes of Omnipotence, it is the search after truth. Every fresh instance discovered of his ineffable arrangements cannot fail to add a new measure to his glory.

If the praises of men are acceptable to him, to unfold the resplendent truths that kindle

those

61

December 1819

those premises must be also acceptable. Yet the presumption of pedantry, the ignorance of learning, will officiously thrust themselves forward, and, in hopes of finding favour with God, trample under their audacious feet whatever can do honour to his name.

[See PDF 66, lower page obscured by this insert:]

Man was born for Labour, his configura-
 -tion, his passions, his restlessness all
 prove it; but labour would wear him
 out, and the purpose of it be defeated,
 if he had not intervals of pleasure,
 and unless that pleasure be innocent,
 both he and society must suffer. Now
 what pleasures are more harmless
 if they else, than those afforded by
 polite arts and polite literature
